

# Dent Mobile XL<sup>®</sup>

The mobile dent repair system for larger vehicles

**PIVAB<sup>®</sup>**  
THE ART OF SPRAY BOOTH

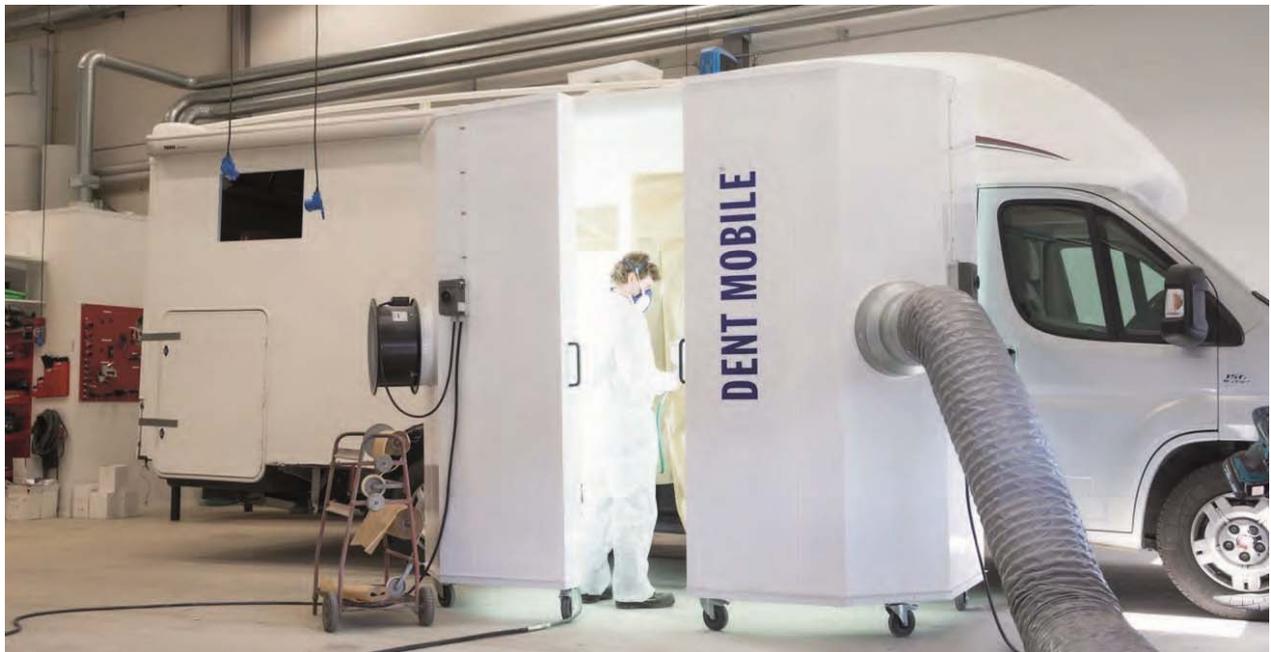

# Dent Mobile XL<sup>®</sup>

Dent Mobile XL is a great patented solution for those who want to supplement their existing facility with a mobile, flexible system for minor damage on larger vehicles. The product consists of 2x mobile units, 1x Supply air unit and 1x Exhaust air unit.

The Dent Mobil XL is used by placing the units on either side of the planned repair area and then creating a flow of air over the object while the damage is being repaired. Note that these should be placed max 2m from each other for optimal function. In order to extend the distance and retain the function, it is possible to wrap the object with the units.

The spray paint station takes no space and can easily be put away when you do not need to use it. It is so smart and flexible that you can take the Dent Mobile XL with you to carry out a job on the customer's premises. The station comes completely assembled with a fan and 3-phase cable with connector. Supply air can be taken from the premises while the exhaust air must be expelled from the premises. Duct connection dim. 400mm.

## DIMENSIONS, DENT MOBILE XL - (SAME FOR BOTH UNITS)

Depth ext	765 mm
Width ext	1530 mm
Height ext	2400 mm

### TECHNICAL INFORMATION - SUPPLY AIR

Luminaires EX-certified		Daylight 2st a' 2 x 58W
