

# Dent Portal<sup>®</sup>

Smart workstation and paint booth  
with unprecedented versatility

**PIVAB**<sup>®</sup>  
THE ART OF SPRAY BOOTH

The product in the picture is extra equipped

# Dent Portal<sup>®</sup>

Our patented Dent Portal<sup>®</sup> is specially designed for smaller spray painting and sanding jobs, dent repair and preparation work. You can repair all minor damage on the spot, without disrupting the flow in your workshop. That means more repairs, increased revenue and shorter lead times.

Dent Portal is the solution for those who want to offer simple paintwork repairs in a small area of their accident repair workshop. Or for those with a paint shop and needing a separate space for small and quick spray paint jobs that do not interfere with the production flow of the larger spray painting jobs

We developed the spray painting booth Dent Portal as a smart solution for dent repair/spot repair work at paint and accident damage workshops. The idea is that you very quickly and cost effectively get a shielded area, designed specifically for the purpose, without disrupting other operations.

You can be more resource efficient, while at the same time ensuring a good working environment.

## TECHNICAL INFORMATION

Luminaires EX-certified	Daylight 6st a´ 2 x 58kW	
Exhaust air filter	Paper filter, paint pocket, F7 bagfilters, Carbon filter* (option)	
Supply air filter	Pivab provides filters for all our products	Viledon M5
Air speed	0,3 m/s	
Capacity aggregate	9000 m3/h	
Electric	16 Amp, 3 phase	
Fans	1x supply air, 2x exhaust air	
Weight	1500 kg	
Installation	Comes in sections, easy to assemble **	

*\* Dent Portal® can be equipped with active carbon filters as an option. This means that you can reuse the energy in the exhaust air - without affecting the rest of the premises. It gives you lower energy costs and a more flexible installation.*

*\*\* The supply air to your DENT PORTAL® is taken directly from the premises and the exhaust air is led out through the roof or walls via spiral ducting. If you dont use the option carbonfilter. The fans meet EU requirements with a ventilation rate of 0.3 m/s. The electricity in the DENT PORTAL® has 16A, 3-phase protection and the luminaires are ATEX certified*

*LED lighting is available. PIVAB's luminaires are prepared for this, so you only need to swap out the fluorescent tube.*
