PIVAB[®]
THE ART OF SPRAY BOOTH

Dent Station 1-2[®]

Dent Station is suitable for all types of sanding and spray painting work. The Dent Station with exhaust air walls and double filter system gives you endless possibilities. A perfect solution for all types of grinding, sanding and spray painting work.

Dent Station is available in two basic designs and is suitable for anyone working with any form of spray painting and needing filtered exhaust air.

Dent Station comes fully assembled on a pallet and is connected to appropriate ventilation aggregates. In addition to the models 1-2, Dent Station can be manufactured in variations.
